

The European Project Semester trains students to work together, providing tools and competences to realize ideas in a real-world environment in close cooperation with local industry. Students work together in an international team on a real-life project that matches their area of study and field of interest.

**The EPS project is a state-of-the-art interdisciplinary semester.** It consists of the following parts:

- **A number of short intensive courses, taught by different (international) lecturers, to support the project work.**
- **Project work by the participating students, with the aim of developing student initiative and individual creativity.** Four to six students work together in an international team on a real situation specific (multidisciplinary) project developing their professional, cooperation and communication skills.

For 2018-2019 we work on three projects:

***A Way Home***  
***Cohousing with Refugees***  
***Big City Life Antwerp***

You can find **more information** about AP's European Project Semester for the spring semester of 2019 on <https://www.ap.be/international/EPS>

Interested? You can download the brochure of EPS and visit <http://eps.ap.be/>

**Important: places are limited and taken up quickly, so do not hesitate!**  
**Application D-line is November 1<sup>st</sup>.**

Are you interested in a cooperation initiative or do you want to host an EPS project at your company? Feel free to contact us at [eps@ap.be](mailto:eps@ap.be) or [bie.dirkx@ap.be](mailto:bie.dirkx@ap.be)
